

# HUMBRELLA

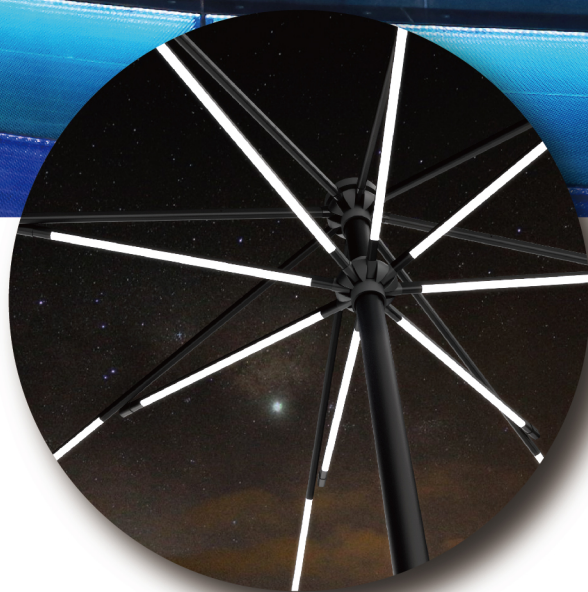

A Multi-utility Mobile Power Station

## Product Highlight

### Create a smartspace, Make a difference

The world's first multifunctional umbrella based on flexible thin-film solar power technology that has capabilities par excellence.

A layer of efficient and flexible thin-film solar chip laid on the surface of the umbrella generate power both on a sunshine day and cloudy day without relying on power grid.

# Product Highlight

## Scientific Canopy, Enjoyable Life

Movable Humbrella with more applicable scenarios, it provides users with secure and lasting power supply guarantee and brings better solutions to open space.

## Detailed Design, Simplified Style

The canopy uses anti-fading treatment material. The chip inside adopts a distributed design. You can feel the high technology at your fingertip.

## Powerful Inner-core, Scientific Life

Green energy: Utilises solar energy as clean power with zero emission and zero pollution.

Technology transformation: Brings to use flexible co-evaporation technology with the highest mass production efficiency in the world.

## Stable Luminous Energy

Stable performance, with stable CIGS power and no light induced decay situation.

## Product Specification

Module Power	50.4W(GSE); 50.8W(Miasole)
Maximum Output	5V/2A
Weight	11KG(without base)
Output Interface	4 USB
Measurement	Height: 2500mm
	Diameter of Pole: 38mm
	Diameter of Fabric: 2800mm
Cell Type	CIGS
Battery Capacity	138Wh
Color	Dark Red, Tope color, Dark Green

The product parameters may be adjusted according to the actual product. For more product information, please consult sales.
